

Awesomium Embedding Tool (AET) for OS X

The **Awesomium Embedding Tool** allows you to easily embed the latest **Awesomium.framework** bundle to an application that uses Awesomium. The tool will simply copy the **Awesomium.framework** installed under **/Libraries/Frameworks** to the **/Contents/Frameworks** directory in the package of your application bundle.

Setting up AET for easy use:

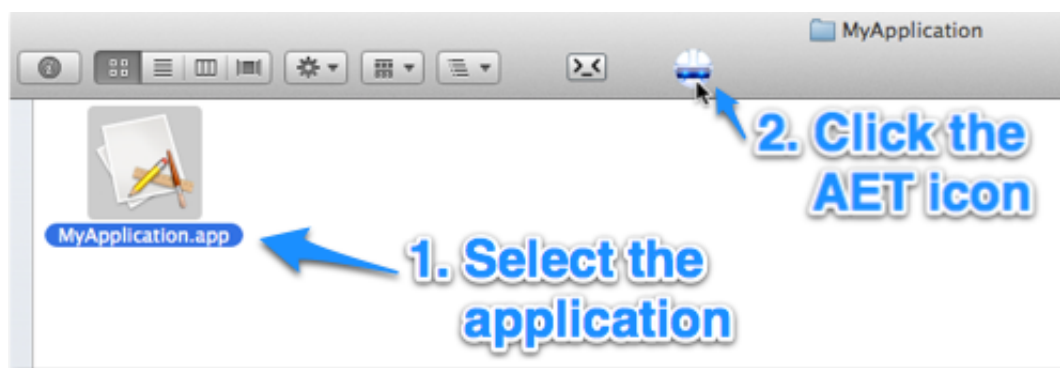

1. Open **Finder** and locate the **Awesomium Embedding Tool** application in your **/Applications/Awesomium** directory.
2. Drag and drop the application to the toolbar of Finder. This will create a shortcut to the application in Finder's toolbar.

Using the tool:

There are 3 ways to use the **Awesomium Embedding Tool**. These are described below:

- If you have added AET in Finder's toolbar, you can:
 - In Finder, select the application you want to embed Awesomium to and click the AET icon in the toolbar (Image 1).

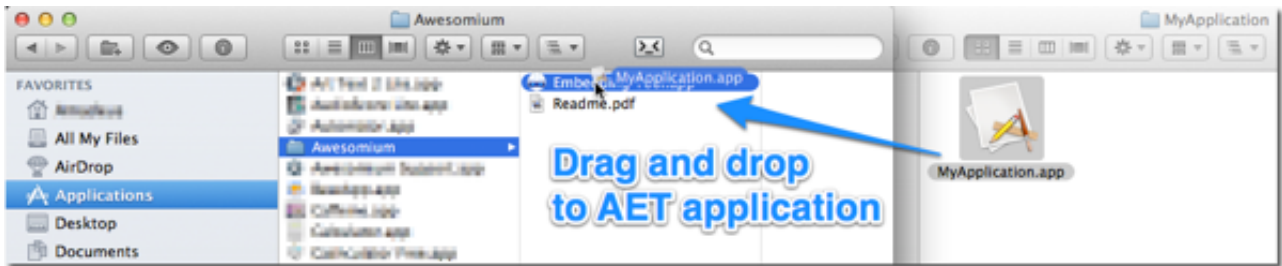

(Image 1)

- In Finder, drag the application you want to embed Awesomium to and drop it on the AET icon in the toolbar (Image 2).

(Image 2)

- If you have not added AET in Finder's toolbar, you can still drag the application you want to embed Awesomium to and drop it on the AET application (Image 3).

(Image 3)

When embedding of *Awesomium.framework* is complete, you will be informed with a dialog.
